

Cost Development Subcommittee Report
PJM Interconnection
Markets and Reliability Committee
The Chase Center on the Riverfront, Wilmington, DE
October 12, 2011

The [Cost Development Subcommittee](#) met on September 12, 2011. This meeting covered the following items:

No-Load Costs

Based upon feedback from the September 15, 2011 Markets and Reliability Committee meeting; PJM staff has reviewed the proposed changes endorsed at the September 12, 2011 CDS meeting. No-Load costs will be reviewed at the October CDS in light of supplemental information and feedback from stakeholders.

Variable Operating and Maintenance (VOM) Cost Definition

CDS discussed and revised the [VOM Cost Definition](#) Collaborative Solution Matrix. Development of a consensus position on the VOM cost definition will be the primary focus of the October CDS meeting.

Unit Types Not Addressed in Manual 15

CDS reviewed the educational document for [Unit Types not addressed in Manual 15](#). CDS will prioritize the various classes of units to be addressed at the October CDS meeting.

Administrative Items:

The next CDS meeting will be held on October 17, 2011.

Future Issues

The CDS plans to address the following future topics:

[Immature Unit Definition](#)

[Combined Cycle Modeling](#)

[Cyclic Peaking Factors for Combined Cycle Units](#)
