

# High Voltage Direct Current Senior Task Force (HVDCSTF) Status Update

Vijay Shah, Facilitator

Sr. Engineer, Real-Time Market Operations

Lisa Krizenoskas, Secretary

Sr. Lead Engineer, Interconnection Projects

Market and Reliability Committee Meeting

March 29, 2021

- Opportunity Statement and Issue Charge approved at the May 2020 MRC
- Task Force to investigate the technical and tariff issues associated with the participation of HVDC converter resources in the PJM Capacity Market
- HVDCSTF met four times over the second half of 2020 discussing wide range of topics
  - Education on the SOO Green HVDC Project
  - Education on Internal and External PJM Capacity Resources
  - Education on Pseudo Ties and Dynamic Schedules
  - NERC requirements
  - PJM and IMM challenges as internal capacity resource

- Interest Identification and Design Components have been developed for the matrix since the last HVDCSTF meeting on October 19, 2020
- Participants continue to meet with PJM to discuss potential proposals however no formal design options or proposals have been made
- Task Force has been on hiatus for ~6 months, canceling the past 6 scheduled meetings
