

2023 PJM Fall Restoration Drill

Doug Guignet & Danny Restucci

State & Member Training

December 12, 2023

Dispatcher Training Subcommittee

- One-day, company wide Fall Restoration Drill for the TOs
- Begin the restoration simulation with a “Bottom Up” approach utilizing the PJM approved TO system restoration manual while adhering to PJM Manual 36. After bottom up restoration strategies have been utilized, a “top down” approach will be used.
- PJM OTS used at Milford

- Restoration Objectives
 - Restore critical load
 - Identify any opportunities for top down restoration
 - Connect to outside areas
 - Return to normal operations

- Milford Drills
 - PJM Operator Involvement
 - PJM Simulator

- Away Drills
 - PJM Operator Involvement

- PJM staffed Operators at the Milford Dispatch Training Simulator room to assist Members utilizing simulator.
- Transmission Owners staffed their company simulators. PJM Operators were present to assist.

- PJM provided a WebEx session to review drill expectations and review the use of SharePoint for drill documentation.
- SharePoint was monitored during the drill and communication was maintained with members to address any questions or concerns.

- TO - 139 Participants
- GO - 21 Participants
- PJM - 35 Participants
- Drill online Refresh - 194 Participants

- Satisfaction Rating - 4.6/5
