Offer Verification Enhancement						◆ Production: June 2						

- To comply with FERC Order 831, PJM implemented a verification process for cost-based incremental energy offers above $1,000/MWh, in early 2018

- The design that was implemented included an opportunity for users to request an exception if their initial offer over $1000/MWh did not pass the automated verification

- Based on stakeholder input, PJM is improving this exception process

- Current process requires users to fill out an Excel template with relevant offer data, proof of fuel purchase and Fuel Cost Policy information then submit this through SharePoint

- The improved process will allow users to enter this information via Markets Gateway

- Target schedule: Spec. Guide/xsd – March 16 (Complete), Train – April 1 (Complete), Markets Gateway User Guide – April 1 (Complete), Production – June 2

Product Details

[Markets Gateway](#) allows users to submit information and obtain data needed to conduct business in the Day-Ahead, Regulation and Synchronized Reserve Markets.

Key Product Features

- View Market Results

- Manage Generation and Load Response Portfolios

- Manage Ancillary Service Data

- Manage Market Offers and Transactions
