

# Load Management Summer Only registrations in DR Hub

DISRS

Pete Langbein

December 4, 2023

- CSP may designate a Load Management registration to be “Summer Only”
  - This means the registration should be linked to a DR resource in Capacity Exchange with a summer only commitment.
  - The registration is required to test if not dispatched during the summer months
  - PJM will still include this registration for Winter dispatch so the registration may respond on a voluntary basis (eligible for energy payment and/or bonus payment under existing rules)
    - WPL is not required on the registration but can be included after a winter event if the resource did respond to dispatch.

- Issue - CSP linked Summer Only registration to an Annual CP resource in Capacity Exchange to avoid submission of WPL information
  - Registration is still required to test if not dispatched during the summer
  - Annual Capacity Resources have annual penalties for test deficiency
    - Registrations are allocated the Capacity Resource commitment.
- DR Hub enhancement – PJM will modify DR Hub to allow annual Load Management registration (this is the default) without WPL information
  - Annual registrations are only required to test if not dispatched.
